GreenStart	May support a defined environmental or sustainability project.	Check if the project is a defined environmental or sustainability project.	Check if the project is a defined environmental or sustainability project.

Evidence checklist

Typical evidence may include project rationale, recent accounts, quotations, implementation plan, projected impact, employment implications, sustainability or export rationale, and confirmation that expenditure has not been committed where scheme rules prohibit it.

Decision summary

Recommended first action: confirm the business's agency/client status and whether any project expenditure has already been committed. Those two facts materially change which routes remain credible.

This sample is illustrative and not a representation of current eligibility. A live Funding Map is built from current official sources and the client's actual project facts. Funding is never guaranteed.
